**Since 1973**, Bonded Lightning Protection delivers optimized lightning protection systems for commercial sites. Protect structure and operations from destruction and disruption of electrical infrastructure.

**Design proficiency** enables seamless system integration with any architectural styling.

**Self-performed installation**, maintenance and lifecycle optimization streamline third-party inspection and certification processes.

Jupiter Medical Center  
Florida

**Bonded Lightning Protection** administers fully, national third-party inspection programs. We manage the one (1) and three (3) year schedules prescribed by Lightning Protection Institute and Underwriter's Laboratories.

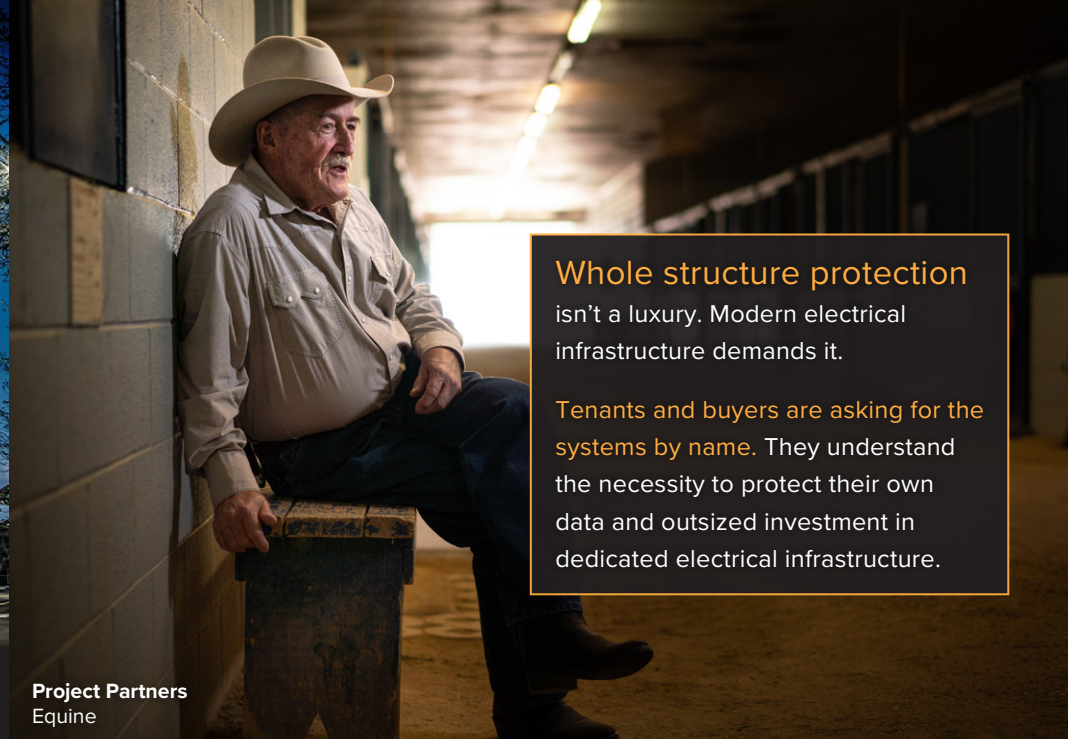

**Inspection, the process**, is *not* **certification**, the desired outcome.

Sustain inspection, achieving certification, *perpetually*.

**Prevail in inspection** processes unique to the military, government, and sectors handling hazardous materials and substances.

## Whole structure protection

isn't a luxury. Modern electrical infrastructure demands it.

Tenants and buyers are asking for the **systems by name**. They understand the necessity to protect their own data and outsized investment in dedicated electrical infrastructure.

**Bonded designed systems** encompass the critical systems and redundancies that are essential in a multitude of commercial environments.

Grove XXIII  
Florida

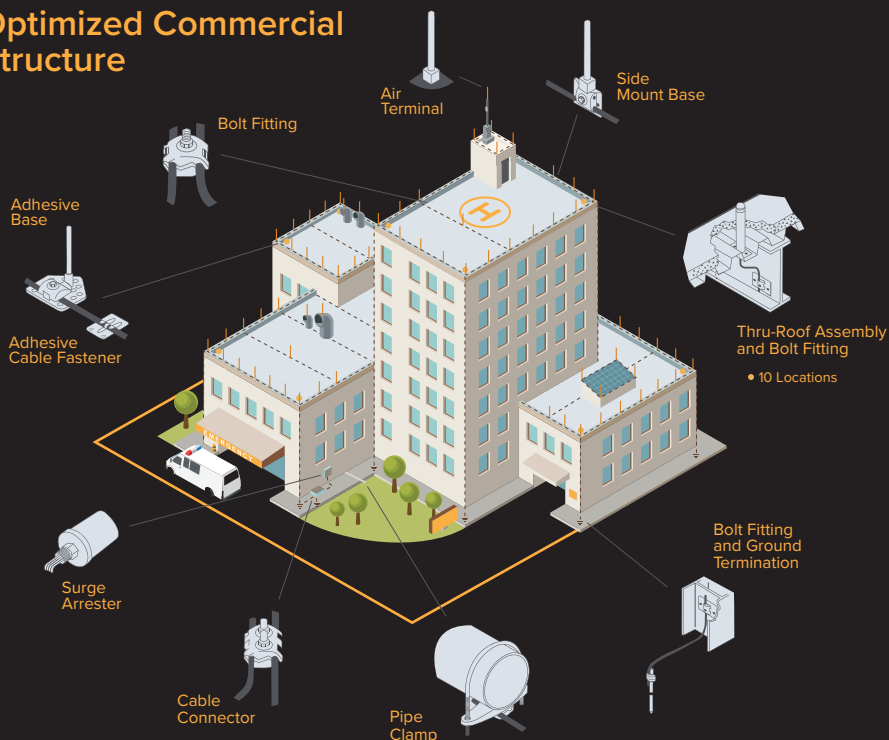

## Critical Redundancy

- Access
- Amenities
- Energy Management
- Electronic Infrastructure
- Fire Safety
- HVAC
- Intrusion
- Life Safety
- Security
- Smart Space

## Optimized Commercial Structure

**Compliant at installation**, in new construction and renovation, at reroof, and as electrical and electronic infrastructure evolves, Bonded Lightning Protection systems and solutions are optimized to suit your operations, and the electrical infrastructure that enables them.

System caretakers, we optimize the systems over time, via maintenance programming that evolves with your electrical infrastructure.

Specify Bonded Lightning Protection systems and solutions with confidence, as we meet and exceed virtually any specification.
