

# Electric Vehicle - EV

Infrastructure  
Communities  
Readiness

Protecting People, Property & Assets®

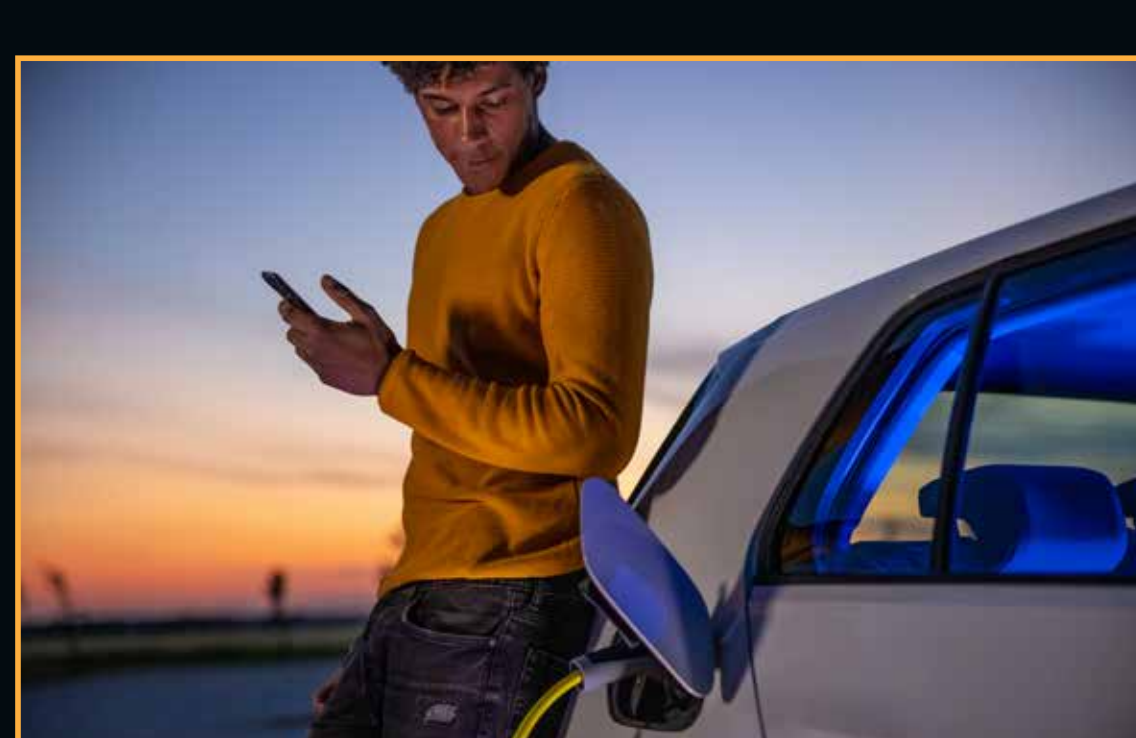

Lightning may be the single greatest threat to EV infrastructure, and EV Ready Communities.

Bonded Lightning Protection is your **single resource**. Delivering **manufacturing, system design, and self-performed installation**, Bonded protects the EV sector with **EV operations specific solutions**.

*Optimization* ensures **longevity** and **suitability** are enhanced over systems' lifetimes.

*Lightning's threats are numerous.*

- Damaged & disrupted infrastructure
- Equipment
- Station(s)
- Vehicle(s)
- Injury and even death can occur

The EV driver, occupants of the vehicle being charged, and other vehicles at the station, and in the vicinity, are at risk.

**It'll soon be electric.**

A Bipartisan Infrastructure Law (BIL) designates \$7.5 billion to the development of North American EV Infrastructure. **500,000 publicly accessible charging stations are planned by 2030**. All require professional lightning protection systems.

**EV station canopies** are designed to protect vehicles, drivers, and passengers from the elements:

- Ice
- Rain
- Snow
- Sun
- Wind

A **lightning protection system** is the only system that protects station and canopy, drivers, vehicles, passengers, and bystanders from lightning.

Bonded Lightning Protection is your EV Community's single resource. Find out more about how we drive EV Community Readiness, at [bondedlightning.com](https://bondedlightning.com).
